MEMORANDUM FOR THE HEAD AVIATION MANPOWER/TRAINING BRANCH (N889)

FROM: CAPT H. B. McDonald
        Head Aviation Readiness/Training Section (N889F)
        Prepared by: AWCS S. A. Russell, N889F6, X46025

Subj: H-3/H-60 AIRCREW TRAINING REQUIREMENTS REVIEW (ATRR)
        REPORT - ACTION MEMORANDUM

PURPOSE: Report findings of the H-3/H-60 ATRR.

DISCUSSION: Per Attachment A, the
H-3/H-60 ATRR was held at NAS North Island, 13-14 Nov, to determine fleet requirements for planned skill progression of H-3/H-60 aircrewmen. This was a productive conference with representatives from CNAP, CNAL, CNARF, NAVAIR, Type Wings FRS and Fleet were present. Enclosure (1) contains attendees.

    - There were no written pipelines for EA-6B Pilots and NFOs. All pipeline requirements were identified for Pilots and NFOs CAT I though IV. We now have the requirements to train these personnel. Pipelines were formalized, CINs were provided and OPNAV Training Management System (OTMS) data was updated, Attachment B.

    - The FRS NITRAS data did not match their curriculum. Of their eight courses; none of the course lengths matched what they had entered into NITRAS. They now have a better understanding of NITRAS and our requirements for NITRAS reporting. They will provide updated inputs.

    - The FRS curriculum was not in the correct format. All curriculum will be rewritten per OPNAV 1500.66.

    - They did not have a Pilot or NFO IUT syllabus. They will be developed and submitted.

RECOMMENDATION: Approve letter promulgating the EA-6B ATRR Report and implementing action items.
